NODE RED SERVICE:

The screenshot displays the IBM Cloud Developer console interface for a Node RED IoT4PD application. The browser address bar shows the URL: `cloud.ibm.com/developer/appservice/apps/a3276f8c-a1ed-40cf-af1d-5b3a8e2355a3`. The page header includes the IBM Cloud logo, a search bar, and navigation links for Catalog, Manage, and the user account (Vinoth K's Account). The main content area is divided into two columns. The left column, titled 'Node RED IoT4PD', contains a 'Details' section with fields for App URL, Source (with a 'Download code' button), Resource group (set to 'Default'), Deployment target, and Created date (17/11/2022). Below this is a 'Services' section listing 'Internet of Things Platform' and 'Cloudant'. The right column, titled 'Deployment Automation', features a 'Configure Continuous Delivery' section with a message stating that Continuous Delivery is not enabled for this app and a 'Deploy your app' button. A vertical 'ASK A QUESTION' button is visible on the far right edge of the interface.
